# Risk Mitigation by **BACK TO BACK HEDGING** mechanism

- To mitigate the risk of commodity prices fluctuation from June, 2016
  - Metal equivalent of the scrap bought, is sold on the same day
    - Pricing against Customer contracts - Natural Hedging
    - Forward Contracts on LME Exchange for balance quantity - till final sale to customer
    - Core inventory was not part of back to back hedging
- Gravita started **hedging of core inventory** also in June, 2019 by taking a forward contract on LME Exchange.
- June, 2019 onwards Gravita is enjoys stable margins and is not affected by the commodity price fluctuations

# Improving **MARKET DYNAMICS IN RECYCLING** - Paradigm Shift

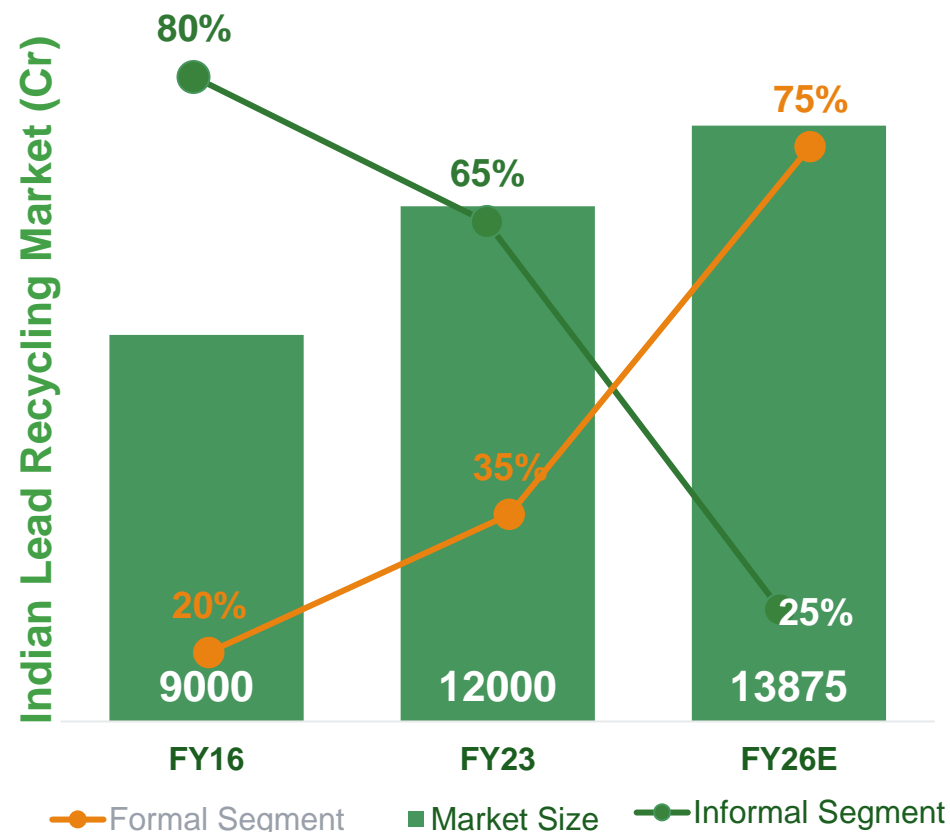

# Shift from **INFORMAL TO FORMAL**

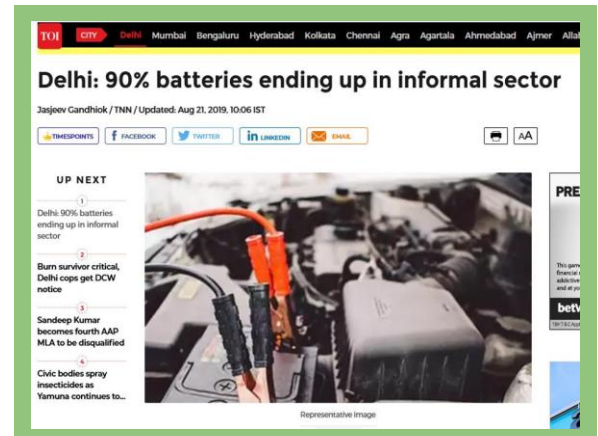

With redefining of Battery Waste Management Rules (BWMR) , Extended producers responsibility (EPR) and stricter implementation of GST, the scrap availability for formal recycling sector has increased and is further expected to grow.

## Informal Lead recycling trend in India

\*Source - Management estimate

**Gravita having Pan India presence and association with OEM's will benefit the most from this shift**

## Focused on Capturing Value from Waste Through Modern Recycling and Recovery

### Recycling Waste:

- Uses scrap of lead, aluminum ,plastic and rubber in manufacturing of finished goods and has a process in place to collect the scrap and recycle the same
- Systems in place to mitigate the exposure risk of hazardous materials

### Conserving Nature:

- Consciously track usage of these resources – water, energy and raw materials, throughout all operations

### Energy Conservation:

- Utilizing alternate sources of energy by installing solar panels for its plants situated at Mundra, Chittoor, Phagi and SEZ Jaipur thereby minimizing the consumption of electricity from commercial electricity boards

### Alternate Energy Source:

- Uses pyrolysis oil generated during waste rubber recycling process as an alternate source of energy for recycling of Lead & Aluminium
- Using carbon briquettes as an alternate source of energy during recycling process
